SMART HOME SOLUTION ON A CAMERA (SOC)

SMART HOME IS EASY NOW

With StarVedia's Smart Home solution, you can easily arm your house with all kind of sensors, like smoke sensor, PIR sensor, glass-break sensor, door/window sensor, flood sensor and you'll get notified when any sensor alarmed anywhere you are. You can start the siren, record the video, lock the door if needed and power on/off any electronics and see if anything happened in your house remotely.

StarVedia's camera is a Z-Wave controller that will easily control all those Z-Wave devices in the market. You can enjoy the Smart Home Technology easily now. When sophisticated technology is made functional and easy-to-use, life becomes effortless.

IC717z

CAMERA TECHNOLOGY

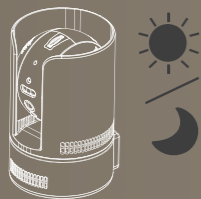

DUAL LENS

BETTER THAN ICR FILTER

The unique, innovative practical design.

Dual-lens is the best answer to defective problem of mechanical ICR filter, it provides best stability and durability.

Dual-lens provides different focus for daylight wavelength and night time infrared wavelength to have clearer video day and night.

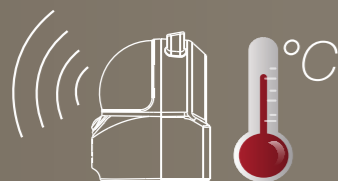

TEMPERATURE ALERT

EXPAND THE APPLICATION AND USAGE OF THE IP CAMERAS

Temperature alarm is very useful in places like green house, drugstore, baby room warehouse where temperature control are very important.

Create new home security market where temperature control is important for those people like baby, elders and sick person.

Temperature alarm is not just a feature of an IP camera, it creates a brand new market.

MACOS SOFTWARE

- >> Free video management software for MacOS 10.7.0 and above.
- >> Up to 6 channel video display.
- >> Support 11 languages.
- >> Remote SD card recorded video playback.
- >> Full control of the camera settings.

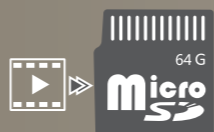

PRIVATE CLOUD DVR SOLUTION (SD CARD)

Private cloud DVR solution turns your camera into all-in-one home security system with no extra recording hardware needed.

Free mobile/tablet app for playback video on your phone both live and past event from anywhere, anytime.

Smart motion recording with PIR sensor can help you to save up disk space and record for weeks with 32GB card.

5 SECONDS PRE-RECORDING

The IP camera is watching your house day and night. When alarm was triggered, the camera will start SD card recording and this recording was even started 5 seconds before the alarm event.

Your mobile device will receive the alarm notification and you could retrieve the recorded video immediately to check the whole situation.

ALARM NOTIFICATION

The mobile device will receive alarm notification immediately when the alarm is triggered and the video is recorded in SD card for later evidence usage. The alarm could be from PIR, motion, sound or temperature.

For those places like green house or warehouse that is very sensitive to temperature changes, the mobile device will receive the alarm notification once when the temperature is out of the specified range.

SMART CLOUD STORAGE

Dropbox and the Dropbox logo are trademarks of Dropbox, Inc.

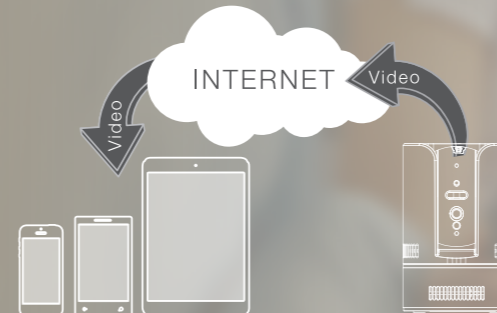

SMART TECHNOLOGY

P2P VIDEO STREAMING

Peer to peer technology decrease the video stream latency.

The video stream does not pass through the server, users will not need to worry that the video could be captured by the server or being hacked.

User accounts are not stored in the server, no need to worry if the server is hacked.

PLUG & PLAY

THE MUST-HAVE FEATURE IN HOME SECURITY MARKRT

StarVedia's IP camera works in any network environment including router behind router.

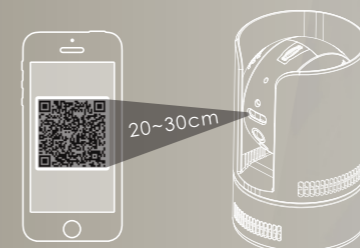

- 1 Connect to network
- 2 Install app on your mobile devices
- 3 Key-in ID/Password to see video immediately

WIFI SETUP

SET UP THE WIFI OF THE CAMERA ON THE FLY

- >> Don't need a computer to configure the camera for WiFi setup.
- >> A mobile device is enough to do this WiFi setup of the camera.
- >> Make true the plug and play setup.

REMOTE OVERSEE

ALERT

Your ultimate security guardian, looking over your home and family.

POWER

Start your brew before getting out of bed with just a swipe of your finger.

RGB BULB

Creating your own selected environment by bulb's color changing, whatever is for partying in the night, resting your mind or spending time with your special someone in a romantic night.

SMOKE DETECTORS

An early warning system to safeguard your home from fire. The detector not only gives a warning sound but also sends notifications to your phone.

SCENARIOS

Z-wave's Scene control system allows you to pre-program multiple scenes that can include lighting, turn the lights off with one button press.

Media, enjoy audiophile sound for music, movies, TV. Get an unlimited supply of music from the Cloud. Watch what you want, where you want, when you want. Climate, keep an eye on the utility bill without working at it. Turn up the heat before you get home from a trip. Remotely access and control your vacation home.

ACCESS CONTROL

Forgot to lock the door? Now you can remotely control the door lock at your fingertips.

WAKE UP

GO TO OFFICE

GO TO SLEEP

TRAVEL

RETURN HOME

5in1 SENSOR

This 5 in 1 sensor detects the temperature, lux, intrusion and any motions in the room. Grasp the overall situation at your fingertips.

SMART HOME TECHNOLOGY WITH Z-WAVE DEVICES

With all kinds of z-wave sensors placed in the house, you know the exact state of your home's situation, at home or away, day or night etc..., gaining the peace of mind knowing that you'll be alerted whenever the back door sneaks ajar or the side window slides open, activate lights, even when the temperature is out of the preset range, you can always be on top of your home's security.
